[Engineering Center Name]

Pre-Project Intake and Discovery Form

ENG-FORM-01 – Template v0.1-draft

Purpose of This Document

This form is the starting point for asking the engineering center for help with a project. It is meant to be filled out before any project charge code exists and before any work begins. Its purpose is to describe, in plain language, what you need help with, why you need it, and what you hope to get out of it, so that the center can decide whether it is a good fit, ask good follow-up questions, and avoid surprises later. Filling out this form does not commit the center's time or resources, and it does not authorize any engineering work to start. It simply starts a conversation on solid footing. It is fine to leave something blank or mark it Unknown if you are not yet sure – the center will help fill in the gaps during discussion.

Document Control

Complete this block when the form is issued and update it each time the record is revised. The Intake Reference Number is independent of any project charge code and stays the same across every later document for this request.

Intake Reference No.:	Status:	Template Version:
Current Revision:	**Revision Date:**	**Prepared By:**

Revision history – add a row each time the record changes after initial completion.

Rev.	Author	Date	Change Summary

If more rows are needed, attach a continuation sheet listing the same columns and reference it here by name.

Requesting Organization and Contacts

Requesting Department / Program:

Sponsor:	Sponsor Email / Phone:
Technical Contact:	**Technical Contact Email / Phone:**

List any additional people who can decide requirements or approve scope changes.

Additional Contact:	Role:
Additional Contact:	**Role:**

If more rows are needed, attach a continuation sheet listing the same columns and reference it here by name.

Problem and Intended Outcome

Describe the situation in your own words. It is fine to be informal here – the center will help translate this into engineering terms during discussion.

Current condition / problem:

Why assistance is needed now:

Desired outcome:

Consequence if nothing is done:

Requested Engineering Assistance

Select every discipline that may apply. It is fine to select more than one, or to select Unsure if you are not certain which discipline is needed.

☐ Mechanical ☐ Electrical ☐ Structural ☐ Systems ☐ Environmental ☐ Unsure – please advise

Requested activities (e.g. design, analysis, assessment, troubleshooting):

Other teams or systems this work interfaces with:

Preliminary Scope Boundaries

These are proposed boundaries for discussion, not an approved Statement of Work. List what you believe is included and excluded.

Work believed to be included:

Work believed to be excluded:

Assets, sites, or systems involved:

Outputs and Success Criteria

Expected deliverables and formats:

Who will review / accept the results:

How success could be measured:

Timing and Resources

Desired completion date:

Hard deadline (if any):

Reason for the hard deadline, if applicable:

Site access / outage windows:

Charge code (if already known):

A charge code is not required to submit this form.

Inputs and Constraints

Available drawings, data, or prior studies:

Attachment reference 1:

Attachment reference 2:

Known applicable standards, codes, or safety / environmental constraints:

Known information-handling requirements for this request:

Assumptions and Open Questions

List anything unknown or undecided. Mark items Unknown or Not applicable rather than guessing; each item should have a follow-up owner.

Open Item	Owner	Target Date

If more rows are needed, attach a continuation sheet listing the same columns and reference it here by name.

Discussion and Acknowledgement

Center reviewer notes from discussion (boundaries clarified, next action):

Acknowledgement

This form reflects current understanding only. It does not commit [Engineering Center Name]'s resources, and the proposed scope may change following further review. Completing this form is not authorization to begin engineering work or to charge project time.
