[Engineering Center Name]

Technical Discovery Addendum – Electrical

ENG-FORM-02E – Template v0.1-draft

Purpose of This Document

This addendum collects the electrical-engineering detail that the Pre-Project Intake and Discovery Form (Document 1) does not ask for. Fill it out only if electrical assistance was indicated on that form. Its purpose is to give the center's electrical engineers enough detail about power, controls, and existing electrical systems to scope the work accurately. It is fine to mark an item Unknown – the center will help fill in technical gaps during discussion.

Contents

Document Control 3

Linked Intake Record 3

Power and Load Requirements 3

Controls and Instrumentation 3

Hazardous Locations and Classifications 3

Applicable Standards 4

Site and Access Constraints 4

Assumptions and Open Questions 4

Acknowledgement 4

Document Control

Complete this block when the form is issued and update it each time the record is revised. The Intake Reference Number is independent of any project charge code and stays the same across every later document for this request.

Intake Reference No.:	Status:	Template Version:
Current Revision:	**Revision Date:**	**Prepared By:**

Revision history – add a row each time the record changes after initial completion.

Rev.	Author	Date	Change Summary

If more rows are needed, attach a continuation sheet listing the same columns and reference it here by name.

Linked Intake Record

Carry the Intake Reference Number forward unchanged from the Pre-Project Intake and Discovery Form for this request.

Intake Reference No. (from Document 1):

Power and Load Requirements

Voltage levels, phase, and load requirements (known or estimated):

Power source and availability (existing service, generator, outage windows):

Controls and Instrumentation

Controls, instrumentation, or automation involved:

Existing one-line diagrams, panel schedules, or electrical drawings available:

Hazardous Locations and Classifications

Known hazardous-location classifications or explosion-proof requirements:

Applicable Standards

List any electrical codes or standards already known to apply (e.g. NEC, NFPA 70E). Leave Confirmed By / Status blank if not yet reviewed by a discipline lead – this records applicability, not compliance.

Standard / Code	Discipline	Confirmed By	Status

If more rows are needed, attach a continuation sheet listing the same columns and reference it here by name.

Site and Access Constraints

Site access, outage windows, or lockout/tagout constraints specific to this work:

Assumptions and Open Questions

Open Item	Owner	Target Date

If more rows are needed, attach a continuation sheet listing the same columns and reference it here by name.

Acknowledgement

This addendum supplements the Pre-Project Intake and Discovery Form and reflects current understanding only. It does not commit [Engineering Center Name]'s resources and is not authorization to begin engineering work or to charge project time.
