[Engineering Center Name]

Technical Discovery Addendum – Mechanical

ENG-FORM-02M – Template v0.1-draft

Purpose of This Document

This addendum collects the mechanical-engineering detail that the Pre-Project Intake and Discovery Form (Document 1) does not ask for. Fill it out only if mechanical assistance was indicated on that form. Its purpose is to give the center's mechanical engineers enough detail about existing equipment, loads, materials, and constraints to scope the work accurately. It is fine to mark an item Unknown – the center will help fill in technical gaps during discussion.

Contents

Document Control 3

Linked Intake Record 3

Equipment and Systems Involved 3

Loads, Motion, and Thermal Considerations 3

Materials and Environment 4

Applicable Standards 4

Site and Access Constraints 4

Assumptions and Open Questions 4

Acknowledgement 4

Document Control

Complete this block when the form is issued and update it each time the record is revised. The Intake Reference Number is independent of any project charge code and stays the same across every later document for this request.

Intake Reference No.:	Status:	Template Version:
Current Revision:	**Revision Date:**	**Prepared By:**

Revision history – add a row each time the record changes after initial completion.

Rev.	Author	Date	Change Summary

If more rows are needed, attach a continuation sheet listing the same columns and reference it here by name.

Linked Intake Record

Carry the Intake Reference Number forward unchanged from the Pre-Project Intake and Discovery Form for this request.

Intake Reference No. (from Document 1):

Equipment and Systems Involved

Equipment / system description (type, make, model, age if known):

Existing mechanical drawings, models, or manuals available:

Loads, Motion, and Thermal Considerations

Known loads, forces, speeds, or motion requirements:

Known thermal, pressure, or fluid-flow considerations:

Materials and Environment

Known or required materials of construction:

Operating environment (temperature, corrosion, vibration, outdoor exposure, etc.):

Applicable Standards

List any mechanical codes or standards already known to apply. Leave Confirmed By / Status blank if not yet reviewed by a discipline lead – this records applicability, not compliance.

Standard / Code	Discipline	Confirmed By	Status

If more rows are needed, attach a continuation sheet listing the same columns and reference it here by name.

Site and Access Constraints

Site access, outage windows, or safety constraints specific to this equipment:

Assumptions and Open Questions

Open Item	Owner	Target Date

If more rows are needed, attach a continuation sheet listing the same columns and reference it here by name.

Acknowledgement

This addendum supplements the Pre-Project Intake and Discovery Form and reflects current understanding only. It does not commit [Engineering Center Name]'s resources and is not authorization to begin engineering work or to charge project time.
