[Engineering Center Name]

Technical Discovery Addendum – Systems

ENG-FORM-02Y – Template v0.1-draft

Purpose of This Document

This addendum collects the systems-engineering detail that the Pre-Project Intake and Discovery Form (Document 1) does not ask for. Fill it out only if systems or integration assistance was indicated on that form. Its purpose is to give the center's systems engineers enough detail about how this work fits with other systems, teams, and requirements to scope the work accurately. It is fine to mark an item Unknown – the center will help fill in technical gaps during discussion.

Contents

Document Control 3

Linked Intake Record 3

Systems and Subsystems Involved 3

Interfaces 3

Integration and Test Considerations 3

Applicable Standards 4

Assumptions and Open Questions 4

Acknowledgement 4

Document Control

Complete this block when the form is issued and update it each time the record is revised. The Intake Reference Number is independent of any project charge code and stays the same across every later document for this request.

Intake Reference No.:	Status:	Template Version:
Current Revision:	**Revision Date:**	**Prepared By:**

Revision history – add a row each time the record changes after initial completion.

Rev.	Author	Date	Change Summary

If more rows are needed, attach a continuation sheet listing the same columns and reference it here by name.

Linked Intake Record

Carry the Intake Reference Number forward unchanged from the Pre-Project Intake and Discovery Form for this request.

Intake Reference No. (from Document 1):

Systems and Subsystems Involved

Systems / subsystems involved and their boundaries:

Existing requirements documents, architecture diagrams, or interface control documents available:

Interfaces

Interfaces with other systems (data, mechanical, electrical, human):

Other teams or organizations that own interfacing systems:

Integration and Test Considerations

Known integration, verification, or test considerations:

Applicable Standards

List any systems-engineering standards already known to apply (e.g. INCOSE guidance, applicable MIL-STD documents). Leave Confirmed By / Status blank if not yet reviewed by a discipline lead – this records applicability, not compliance.

Standard / Code	Discipline	Confirmed By	Status

If more rows are needed, attach a continuation sheet listing the same columns and reference it here by name.

Assumptions and Open Questions

Open Item	Owner	Target Date

If more rows are needed, attach a continuation sheet listing the same columns and reference it here by name.

Acknowledgement

This addendum supplements the Pre-Project Intake and Discovery Form and reflects current understanding only. It does not commit [Engineering Center Name]'s resources and is not authorization to begin engineering work or to charge project time.
